

Post-operative medications for:

## Pterygium surgery

RIGHT / LEFT eye

Notes: Always wait 3-5 minutes between eyedrops. If multiple eyedrops are due at the same time, allow the eyedrop to absorb before putting in next eyedrop

	Medication	How many times PER DAY	How long	Notes
A	Maxidex eyedrop	Every 2 hours	Initial 1 week	Steroid eyedrop to control inflammation
		Then 4 times per day	3 weeks (weeks 2 to 4)	Shake before use. Should look "milky".
B	Chlorsig eye ointment (Chloramphenicol)	2 times per day	2 weeks	Antibiotic eye ointment to prevent infection and discomfort
