

Post-operative medications for:

Vitrectomy surgery

RIGHT / LEFT eye

Notes: Always wait 3-5 minutes between eyedrops. If multiple eyedrops are due at the same time, allow the eyedrop to absorb before putting next eyedrop

	Medication	How many times PER DAY	How long	Notes
A	Maxidex eyedrop	4 times per day	4 weeks	Steroid eyedrop to control inflammation. Shake before use. Should look "milky".
B	Chlorsig eyedrop (Chloramphenicol)	4 times per day	2 weeks	Antibiotic eyedrop to prevent infection
